

Sinergise

Anže Zupanc

Sinergise

- Small company changing the world one step at a time

*Service providing you fast and simple
access to satellite data*

- Around 85 employees
 - 4 physics, 1 mathematics, 1 medical imaging PhDs
 - 4+ physics masters

Earth Observation Research teams

- Research and development within EU Horizon, ESA, ... projects
- Developing novel ways to extract value in satellite imagery
 - Organized like research group
 - Journal clubs
 - Research Meetings
 - Putting research into production

Enormous volumes of Earth Observation data

Commercial

DigitalGlobe

WorldView-4
Launch Mass 2,485kg

AIRBUS

Pleiades
Launch Mass 970kg

planet.

PlanetScope (Dove)
Launch Mass 4kg

Open Data

esa

Sentinel-2
Launch Mass 1,130kg

NASA USGS

Landsat-8
Launch Mass 2,780kg

NASA

Aqua (MODIS)
Launch Mass 2,934kg

Taken from: <https://www.radiant.earth/infographic/the-view-from-above/>

Characteristics I: Spatial Resolution

Aqua (MODIS)
250m Resolution

Landsat-8
30m Resolution

Sentinel-2
10m Resolution

PlanetScope (Dove)
3m Resolution

Pleiades
0.5m Resolution

Worldview-4
0.3m Resolution

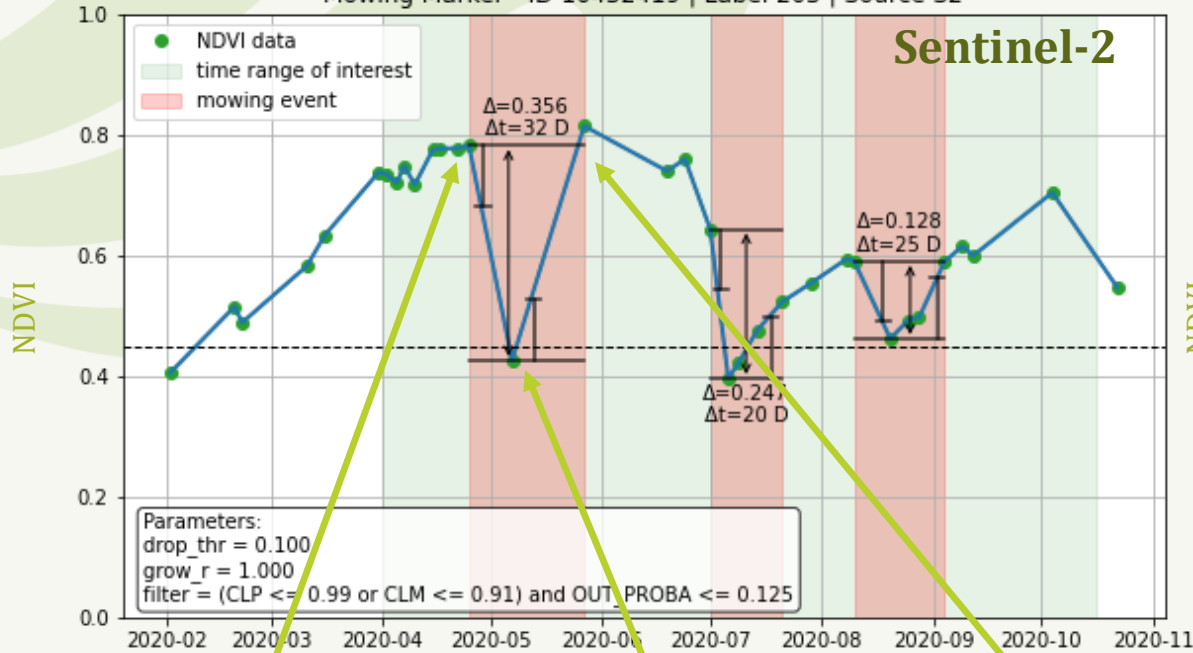

Characteristics II: Temporal Resolution

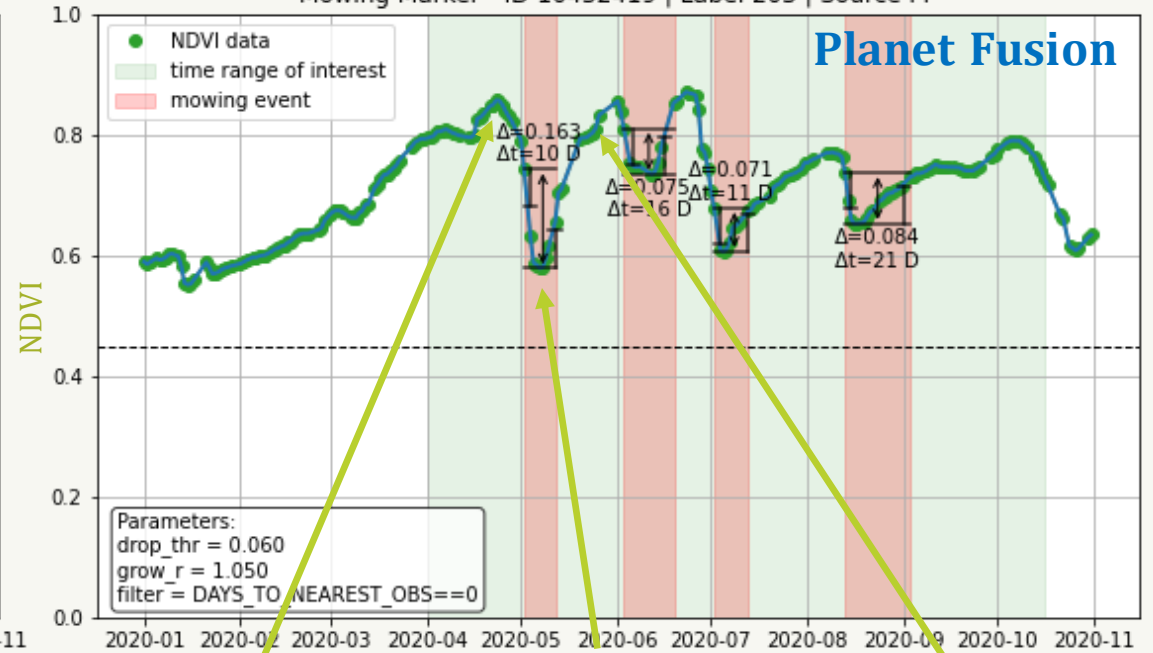

Monitoring farming activity (mowing of grass) across EU

Mowing Marker - ID 10432419 | Label 203 | Source S2

Mowing Marker - ID 10432419 | Label 203 | Source PF

Characteristics III: Spectral Resolution

WAVELENGTHS (meter)

Characteristics III: Spectral Resolution

Reflectance of water, soil and vegetation in different wavelengths:

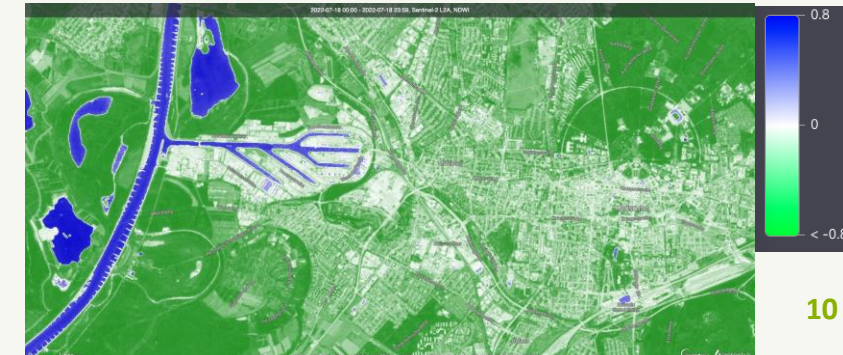

True color

NDVI

NDWI

Classical Remote Sensing Features:

$$\text{Normalized Difference Vegetation Index} = \frac{\text{NIR} - \text{RED}}{\text{NIR} + \text{RED}}$$

$$\text{Normalized Difference Water Index} = \frac{\text{GREEN} - \text{NIR}}{\text{GREEN} + \text{NIR}}$$

Open data is empowering individuals

DEMO: EO Browser

EO Browser makes it possible to browse and compare full resolution images from all the data collections.

Cape Town water crisis in 2018

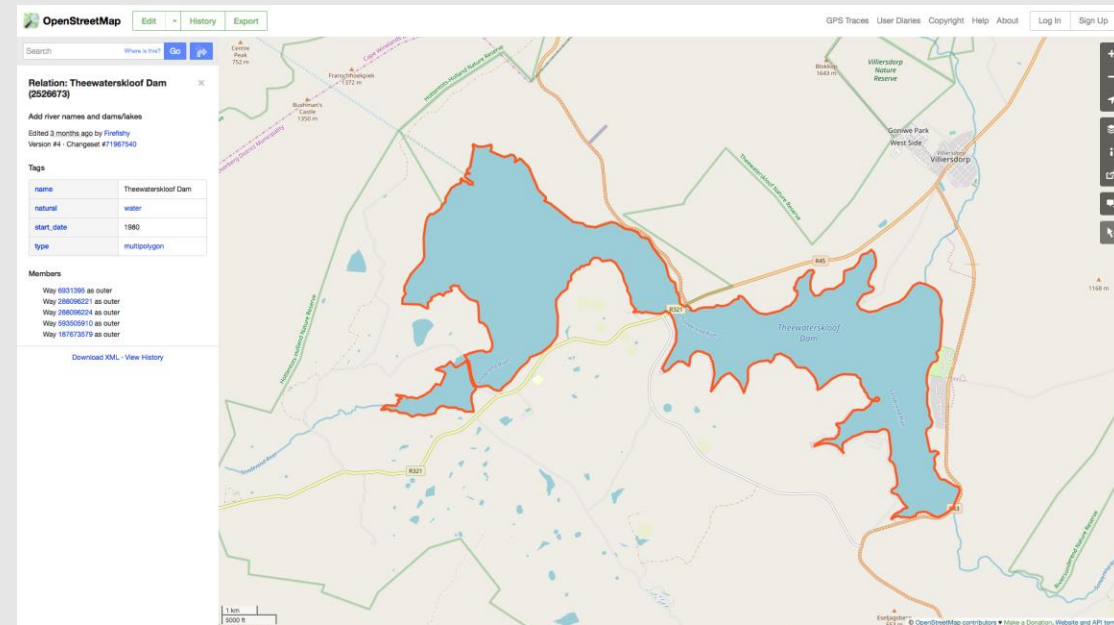

The waterskloof dam

Monitoring surface water levels from space

1. Take water body's outline
2. Get satellite acquisition
3. Detect surface water
4. Extract surface water area/boundaries
5. Calculate surface water level
6. Store measured water outline

Open Street Map

Monitoring surface water levels from space

1. Take water body's outline
2. Get satellite imagery
3. Detect surface water
4. Extract surface water area/boundaries
5. Calculate surface water level
6. Store measured water outline

SentinelHub

True color

2017/5/31

Monitoring surface water levels from space

1. Take water body's outline
2. Get satellite acquisition
3. Detect surface water
4. Extract surface water area/boundaries
5. Calculate surface water level
6. Store measured water outline

SentinelHub

Normalized Difference Water Index

2017/5/31

Monitoring surface water levels from space

1. Take water body's outline
2. Get satellite acquisition
3. Detect surface water
4. Extract surface water area/boundaries
5. Calculate surface water level
6. Store measured water outline

Canny edge detector

Monitoring surface water levels from space

1. Take water body's outline
2. Get satellite acquisition
3. Detect surface water
4. Extract surface water area/boundaries
5. Calculate surface water level
6. Store measured water outline

Otsu thresholding

NDWI

Monitoring surface water levels from space

1. Take water body's outline
2. Get satellite acquisition
3. Detect surface water
4. Extract surface water area/boundaries
5. Calculate surface water level
6. Store measured water outline

Water mask

Monitoring surface water levels from space

1. Take water body's outline
2. Get satellite acquisition
3. Detect surface water
4. Extract surface water area/boundaries
5. Calculate surface water level
6. Store measured water outline

Water mask

Monitoring surface water levels from space

1. Take water body's outline
2. Get satellite acquisition
3. Detect surface water
4. Extract surface water area/boundaries
5. Calculate surface water level
6. Store measured water outline

Vectorize

Monitoring surface water levels from space

1. Take water body's outline
2. Get satellite acquisition
3. Detect surface water
4. Extract surface water area/boundaries
5. Calculate surface water level
6. Store measured water outline

$$\text{Surface water level} = \frac{\text{Detected water area}}{\text{Water body area}}$$

Monitoring surface water levels from space

1. Take water body's outline
2. Get satellite acquisition
3. Detect surface water
4. Extract surface water area/boundaries
5. Calculate surface water level
6. Store measured water outline

SINERGISE'S 2nd SUMMER SCHOOL!

Earth Observation: From a Satellite Image to Modern Applications

Would you like to learn about the technologies and tools used to develop modern applications that help us monitor our planet?

- Do you enjoy coding and want to improve your skills?

Do you want your solutions to have an impact in the real world?

JOIN US in July 2023!
