

Machine Learning for BSM - tools

Requirements

- python3
- jupyter
- pytorch
- numpy
- matplotlib
- sklearn

The notebooks that require GPU training will be provided on Google Colab, an online Jupyter notebook environment.

In case of unstable internet connection, you can install the packages locally after creating a virtual environment with pip or conda.

e.g.

```
conda create -n myenv python3
```

or

```
python3 -m venv path/to/venv
```
