

Workshop: Accelerating CUDA C++ Applications with Multiple GPUs

Wednesday, September 11, 2024

Introduction to CUDA Streams: (– Learn the rules that govern concurrent CUDA Stream behavior. – Use multiple CUDA streams to perform concurrent host-to-device and device-to-host memory transfers. – Utilize multiple CUDA streams for launching GPU kernels. – Observe multiple streams in the Nsight Systems Visual Profiler timeline view.) (10:45 AM - 12:45 PM)
