Hands-on challenge 1/2

Tuesday 3 December 2024 15:30 (1 hour)

After the theoretical session, participants will transition into 2-hour hands-on challenge:
- The challenge will involve performing a simulation using LAMMPS with Kokkos in EESSI.
- Participants will simulate the flow past a sphere, utilizing the VEGA supercomputer for calculations.
- This challenge will be a practical application of the tools and concepts covered during the theoretical presentation.

Session Classification: MultiXscale hackathon
