

POP3: Performance Optimisation and Productivity Center of Excellence in HPC

Marta Garcia-Gasulla, BSC

POP CoE

- A Centre of Excellence
 - On Performance Optimisation and Productivity
 - Promoting best practices in parallel programming
- Providing FREE Services
 - Precise understanding of application and system behaviour
 - Suggestion/support on how to refactor code in the most productive way
- Horizontal
 - Transversal across application areas, platforms, scales
- For (EuroHPC) academic AND industrial codes and users!

Context and history

- POP-CoE starts in 2015
- Objectives:
 - To offer performance analysis services to European HPC users.
 - To develop a common methodology for performance analysis
- POP1 runs from October 2015 to March 2018
- POP2 runs from December 2018 to June 2022
- POP3 will run between January 2023 and December 2026

Partners

• Who?

- BSC, ES (coordinator)
- HLRS, DE
- INESC-ID, PT
- IT4I, CZ
- JSC, DE
- RWTH Aachen, IT Center, DE
- TERATEC, FR
- UVSQ, FR

A team with

- Excellence in performance tools and tuning
- Excellence in programming models and practices
- Research and development background AND proven commitment in application to real academic and industrial use cases

High-Performance Computing Center Stuttgart

JÜLICH SUPERCOMPUTING CENTRE

Partners

- Who?
 - BSC, ES (coordinator)
 - HLRS, DE
 - INESC-ID, PT
 - IT4I, CZ
 - JSC, DE
 - RWTH Aachen, IT Center, DE
 - TERATEC, FR
 - UVSQ, FR

High-Performance Computing Center Stuttgart

IT4I

JÜLICH SUPERCOMPUTING CENTRE

Why it works?

- Diversity of expertise to cover all areas
 - Some of them tool developers, some of them analysts, some customer advocate
- Diversity of tools for resiliency
- Diversity of backgrounds to design a common methodology

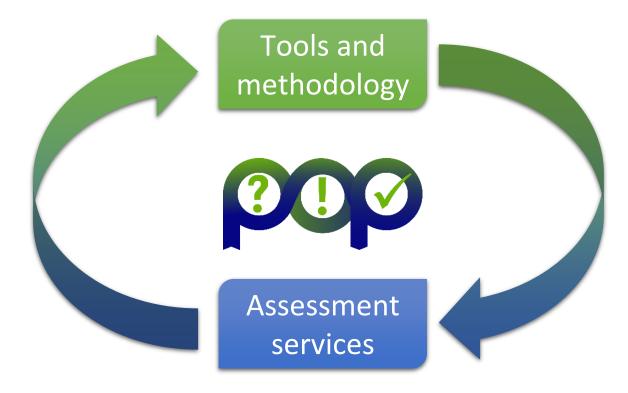

Objectives Assessment Tools and

services

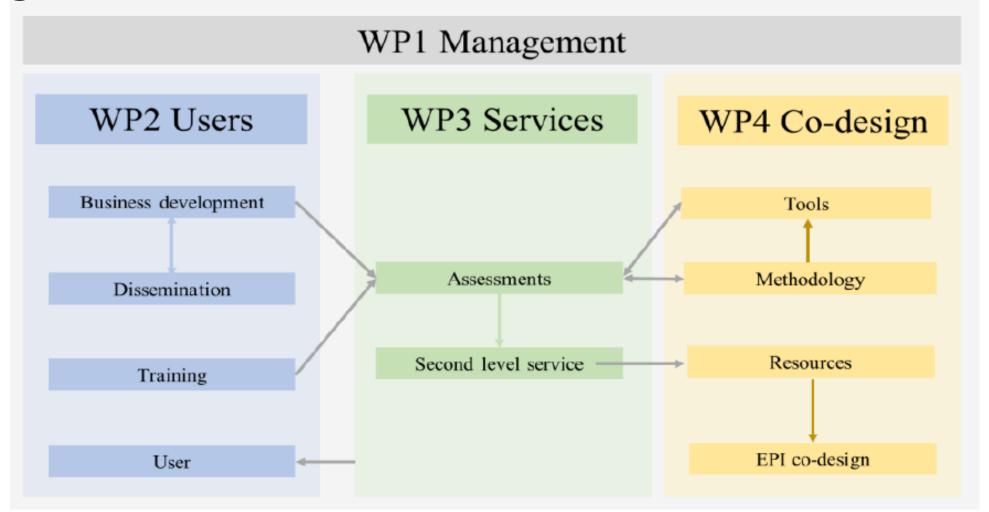

methodology

Objectives

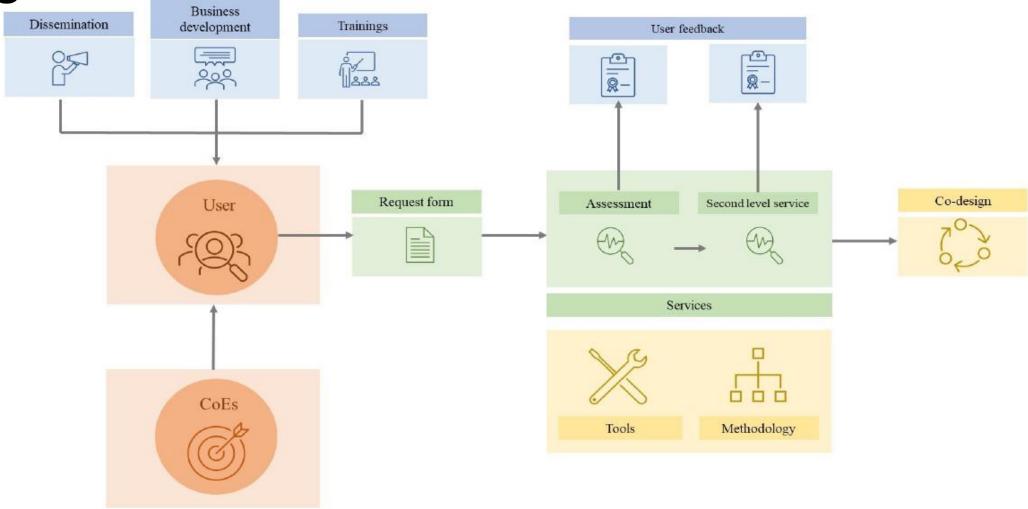

Organization

Organization

FREE Services provided by the CoE

- Parallel Application Performance Assessment
 - Primary service
 - Initial analysis measuring a <u>range of performance metrics</u> to assess quality of performance and identify the issues affecting performance (at customer site)
 - If needed, undertakes further performance evaluations to identify the root causes of the issues found and qualify and quantify approaches to address them (recommendations)
- Second Level Services
 - Second level services may follow after conclusion of an initial performance assessment:
 - **Proof-of-concept**: explore the potential benefit of proposed optimisations by applying them to selected regions of the applications
 - Correctness-check: evaluate the correctness of hybrid MPI + OpenMP applications
 - Energy-efficiency study: investigate improvements of energy consumption or efficiency
 - Advisory study: ongoing consultancy for customers that choose to implement proposed optimisations on their own
- Note: Effort shared between our experts and customer!

Target Customers

Code developers

- Assessment of detailed actual behaviour
- Suggestion of most productive directions to refactor code

Users

- Assessment of achieved performance in specific production conditions
- Possible improvements modifying environment setup
- Evidence to interact with code provider

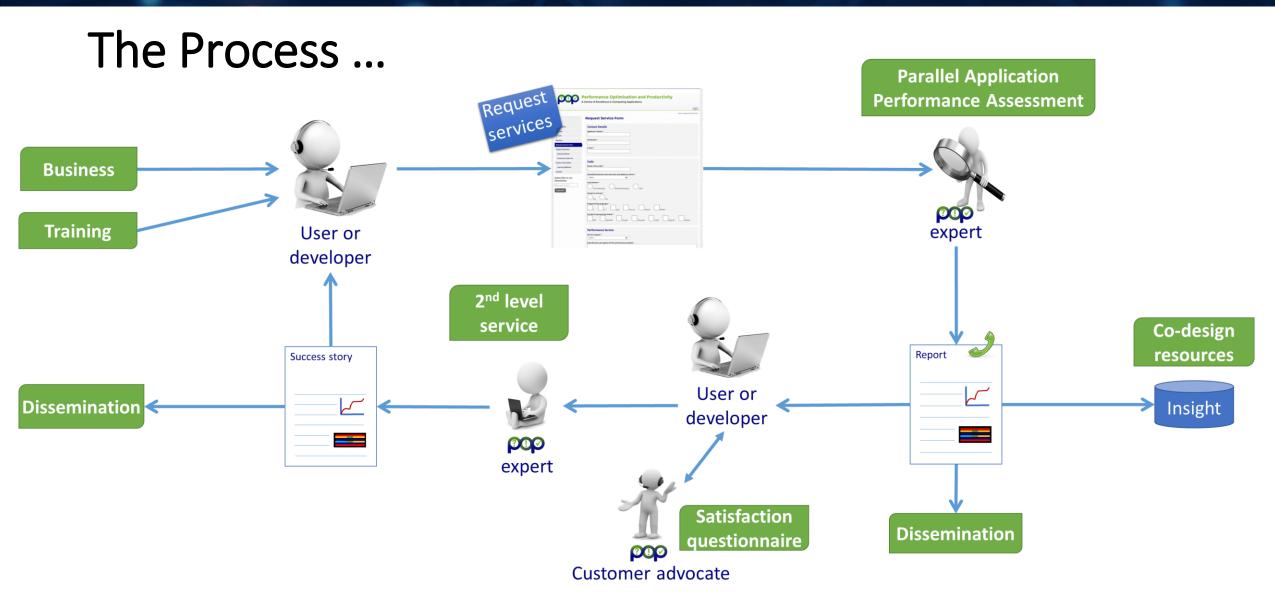

Infrastructure operators

- Assessment of achieved performance in production conditions
- Possible improvements from modifying environment setup
- Information for time computer time allocation processes
- Training of support staff

Vendors

- Benchmarking
- Customer support
- System dimensioning/design
